## **RADAR X:** double the trapping power, double the protection.

Introducing the latest innovation in connected mouse control: RADAR X, an effective, bait-free solution with dual-catch capability.

RADAR X is the newest addition to PestConnect, our system of connected devices for 24/7 monitoring, and together with rapid response from our expert technicians, it offers enhanced protection against costly infestations.

Use biocides safely. Always read the label and product information before use.

# DOUBLE UP YOUR MOUSE DEFENCE WITH RADAR X

## How it works

RADAR X is designed to **stop mice in their tracks** quickly and effectively.

**1** As a mouse enters the unit, it **triggers infrared sensors** and the entrance instantly closes.

**2** Inside the tightly sealed chamber, CO<sub>2</sub> is simultaneously released for **rapid control**.

**3** When the device is triggered, **our technicians are notified of the activity** and will quickly contact you to arrange a convenient time to service the unit and inspect your premises.

## Why RADAR X

- > **Dual chambers** for double the trapping power and protection
- > **Robust, dust-tight device**, protected against water jets from any angle
- > **Effective, bait-free treatment** providing rapid mouse control
- > **Minimised impact** on non-target species
- > **Chambers discreetly contain eliminated mice** to minimise contamination risk
- > **Easy-to-access reporting** via myRentokil for incident updates and audit support

**RADAR X**

**EXTRA MONITORING. EXTRA PROTECTION. EXTRA PEACE OF MIND.**
