

Rentokil

The Experts in Pest Control

Flexi Armour Shield

Defending your premises against pests

The smallest holes and gaps in a building's structure can make a building vulnerable to pest entry and infestation. If the gap isn't big enough, they'll often enlarge it by gnawing to gain access to a property.

Once inside, these quick-witted creatures can spread germs and bacteria onto any surface they encounter, threaten your reputation, spread diseases with their urine and droppings and cause physical damage by gnawing through wiring and pipes.

The solution? A unique proofing tape built with a dense stainless mesh, providing a sticky, flexible and virtually impenetrable barrier for rodents.

Key features and benefits

- **Prevents infestations**, so reduces the use of pesticides to control infestations and **contributes to your sustainability goals**.
- **Suitable for internal and external use**, helping you protect the most vulnerable areas of your premises, wherever these may be
- **Quick and easy installation**
A professional, quick and effective installation service to minimise impact on your business
- **Withstands all weather conditions**, providing continuous and adequate protection against pests
- **Leaves no residue after removal**, helping you keep your premises clean

Why use Flexi Armour Shield

Flexi Armour Shield is part of Rentokil's Flexi Armour range of rodent proofing solutions.

This extremely durable rat and mouse proofing tape quickly and easily makes small gaps and cracks inaccessible to rodents. Pest-proofing your building has never been easier; the tape is a hassle-free solution to combating pesky pests.

It's been designed with a layer of stainless steel mesh that rodents can't gnaw through. It's used to cover holes and cracks in building substrates, sealing potential entry points and defending your premises against pests.
